

How to check Windows Version and Edition

1. Click Start 
2. Type "About your PC" and click enter
3. Scroll Down to "Windows Specification" section
4. You now have access to Windows Edition and Version

The screenshot shows the Windows specifications window. At the top left is the Windows logo and the text "Windows specifications". At the top right is a "Copy" button and an upward-pointing arrow. Below this is a table of system information:

Edition	Windows 11 Pro
Version	24H2
Installed on	12/26/2024
OS build	26100.2894
Serial number	MJ0K5HV3
Experience	Windows Feature Experience Pack 1000.26100.36.0

Below the table are two blue links: [Microsoft Services Agreement](#) and [Microsoft Software License Terms](#).
